Mr. Weisberg, 8-21-96

I am writing you this letter for two reasons. One, I would like to order two (2) of your books – Whitewash and Post Mortem. Second, I have just finished reading "Never Again" and was very impressed with your facts on the assassination. To me the compelling fact of a conspiracy to murder JFK was the bullett that missed. There were just too many bulletts fired for just Oswald. I believe that at least five (5) shots were fired and probably more. I believe JFK was hit three (3) times – the back, the throat (front) and the head (front right temple). Connally at least once. The stray bullett that hit James Tague – total (5)!!
Also, the fact that Oswald's bulletts were full-metal jacketed which would not fragment on contact with the body as did the head shot. There are many many others but these are enough to have made me know that Oswald could not have been the lone assassin. However, I do believe he was in on it.

To close, I want to thank you for all your hard work you have spent researching and obtaining the closed files. From the day I saw Oswald

shot I started believing something did not make sense.

I hope your feeling ok! If at all possible I would love to have your signature on the books. I have read a ~~lot~~ of around (40) books on the subject and have enjoyed reading yours the most because it is fact instead of all these "crazy" theories that tarnish the conspiracy buffs. I started reading your "Case Open" tonight with the book "Case Closed" beside it for comparison purposes.

Anyway, take care and May God Bless.

A Fellow Believer,
Don Gibbons
